Subject: Fwd: Farmington Water Intake Surface Water location?

Could you please check the coordinates. I may have screwed them up

Subject: Farmington Water Intake Surface Water location?

Hi David,

I believe the lat/long coordinates may be incorrect for the Region 6 location 'Farmington Water Intake'. The coordinates they provided (latitude=36.838447, Longitude=-107.992417) put this location north of Durango, CO while Farmington is in New Mexico. I left this location in the surface water graphs that I provided over the weekend – let me know if you would like me to remove it or if the data from this location needs to be moved within the graph. The locations are arranged going from upstream to downstream in the graphs.

Thank you,

Rebekha Shaw
